PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 7+ years of experience building and maintaining production systems across Linux/Unix environments. Proficient in Docker, containerized workflows, CI/CD pipeline management, and backend development across Python, Node.js, and JavaScript ecosystems. Experienced in writing clear technical documentation, designing reproducible development environments, and debugging complex systems issues across the full stack. Comfortable working independently in remote, async settings and delivering reliable, well-tested solutions.

TECHNICAL SKILLS

Systems & DevOps: Linux/Unix, Bash Scripting, Docker, Jenkins, GitLab CI/CD, CI/CD Pipeline Management, Git

Backend & APIs: Python, Django, Node.js, Express.js, REST APIs, Third-Party Integrations, Payment and Notification Systems

Frontend: React, React Native, TypeScript, JavaScript, Tailwind CSS, Zustand, Storybook

Databases: PostgreSQL, MongoDB, Data Modelling, Query Optimisation

Build & Tooling: npm, Docker Compose, Jenkins, Figma, Photoshop

Soft Skills: Technical Documentation, Problem Solving, Remote Collaboration, Project and Time Management

PROFESSIONAL EXPERIENCE

Self-Employed (Freelance) | Lagos, Nigeria

Software Developer | June 2017 – Present

- Containerized 8+ client applications using Docker, ensuring consistent and reproducible environments across development, staging, and production.
- Delivered 15+ custom full-stack web applications for clients across education, retail, and service-based businesses, consistently meeting agreed delivery milestones.
- Wrote clear technical documentation — including setup guides, API references, and deployment runbooks — for all major client projects.
- Integrated payment gateways (Paystack, Flutterwave) and notification services across 8 client products, improving transaction reliability and user trust.
- Managed full project lifecycle independently — scoping, delivery, deployment, and documentation — across engagements ranging from short builds to multi-month retainers.

Tuteria Limited | Lagos, Nigeria

Software Developer | September 2022 – May 2024

- Managed and optimised CI/CD pipelines using Jenkins and GitLab, significantly cutting average deployment time and increasing release frequency across engineering squads.
- Worked extensively in Linux-based environments for development, debugging, and production support across backend Node.js and PostgreSQL services.
- Built and maintained reusable component libraries and platform features serving 50,000+ registered users on one of Nigeria's leading tutoring marketplaces.
- Resolved 30+ production incidents across an 18-month period, diagnosing issues across containerized services and maintaining strong platform availability.
- Drove a sustained reduction in critical bugs through systematic testing, code reviews, and documentation of technical decisions.

PennyTots | Remote Contract

Mobile & Full-Stack Developer | September 2024 – May 2025

- Worked in a fully remote, async environment delivering mobile features on schedule with minimal supervision.
- Contributed to a React Native mobile app targeting parents, building 12+ reusable UI components that improved development consistency and reduced future build time.
- Integrated payment and push notification flows, improving checkout completion and user re-engagement across the product.

BotTrader | Remote Contract

Full-Stack Developer | February 2025 – July 2025

- Built and maintained a real-time trading dashboard serving 500+ active users, working across Python backend services and React frontend in a Linux development environment.
- Integrated 3 external financial data APIs and resolved cross-service bugs, noticeably reducing data latency on key dashboard views.
- Wrote and maintained technical documentation for data flow architecture and API integration patterns.

GCL Hub | Lagos, Nigeria

Software Developer | August 2018 – June 2019

- Developed and maintained 20+ reusable React.js components, improving UI consistency and reducing interface-related bug reports.
- Improved website structure and navigation, contributing to measurable improvements in session engagement following launch.

Tutera Limited | Lagos, Nigeria

Software Developer Intern | June 2017 – August 2018

- Supported development and testing of 5 new platform features alongside senior engineers, contributing to 3 successful production releases within the first 6 months.
- Resolved 40+ reported bugs across the web platform, improving ticket resolution speed and reducing the open backlog.
- Participated in weekly code reviews and improved code quality through cleaner implementation, better documentation, and faster issue resolution.

SELECTED PROJECTS

Parking Ticket Notification System | Full-Stack Project

- Designed and containerized a multi-step backend system using Docker, automating ticket issuance and real-time alert delivery across 3 client sites.
- Built backend workflows, notification logic, and an admin dashboard from scratch with full documentation; deployed and maintained in production for 2+ years.

Payment & Notification Integrations | Client/Product Work

- Delivered payment and notification integrations across 8 client platforms using Paystack and Flutterwave, with documented setup guides and reproducible deployment configurations.

Tutera Product Platform | EdTech Platform

- Contributed to a platform serving 50,000+ users, supporting CI/CD workflows and writing technical documentation that improved onboarding for new engineers.

EDUCATION

Robert Gordon University

MSc, Information Technology for the Oil and Gas Industry

Aberdeen, Scotland | February 2015 – June 2016

University of Ibadan

BSc, Petroleum Engineering

Ibadan, Nigeria | November 2007 – December 2012
